Essay Question:

Over 80 years ago, America's farmers and rural citizens joined together to bring electricity to their communities — communities which the for-profit companies refused to serve. As a result, they improved the quality of life for rural Americans by satisfying an unmet need. Today, co-ops of all kinds bring that same spirit of purpose and cooperation to the changing needs of new generations.

“Which of the seven cooperative principles do you think is most important, and why?”
